Nimbus Mobile Gateway

Get more done by streamlining maintenance and commissioning

Nimbus Mobile Gateway is a portable test logger for fire alarm service engineers and technicians. It quickly connects to fire alarm systems and links on-site commissioning and service teams directly to the fire panel. This means they can receive immediate feedback from the panel as they inspect and test connected assets.

Nimbus Mobile Gateway is supplied in a portable carry case and includes a USB battery, auxiliary power cables and a USB power adapter.

Be on the go

Paperless records

✓ Create a central log of service activity by device, engineer and date

✓ Reduce administration and save hours of tedious paperwork

✓ Securely produce an independent proof-of-testing audit trail, streamlining external auditing

Performance data

✓ Facilitates monitoring and analysis of each site and engineer workload

Plan and schedule

✓ Easily schedule annual service visits including which fire alarm devices are to be tested each visit

Organise your work day and get more done by using the Mobile Gateway and the Nimbus Engineer App.

✔ Access your test schedule in the palm of your hand

✔ Record test results with comments and photos

✔ Real-time test evidence and device verification

✔ Increase engineer efficiency

✔ Lower operational expenses

✔ Increase staff productivity with single engineer testing

✔ Rectify defects faster with immediate confirmation and automatic test records
